    anti_join(pt_stopwords, by = "word")

}

```

## Sports Overall

```

likert_overall_sport <- likert(items = survey_df %>% dplyr::select(sport_experience))

likert_overall_sport

```

	Item	Not	Great	Meh	Neutral	Great	Amazing
1	sport_experience		0	0	17.94872	11.53846	70.51282

We can see that over 70% of students thought that the camp was amazing.

```
plot(likert_overall_sport)
```

We can see that over 82% of students thought that the camp was either great or amazing.

## Subjects Overall

```
likert_subjects <- likert(items = survey_df %>% dplyr::select(art, english, computer, human_r
```

```
likert_subjects$results
```

Item	Not Great	Meh	Neutral	Great	Amazing
art	1.282051	0.000000	19.230769	5.128205	74.35897
english	2.597403	3.896104	33.766234	11.688312	48.05195
computer	2.564103	1.282051	25.641026	10.256410	60.25641
human_rights	0.000000	0.000000	20.779221	11.688312	67.53247
career_readiness	8.860760	5.063291	29.113924	16.455696	40.50633
team_building	1.282051	0.000000	1.282051	1.282051	96.15385
yoga	2.666667	8.000000	10.666667	9.333333	69.33333

```
plot(likert_subjects, centered=TRUE, center=3, include.center=TRUE)
```

We can see that over 97% of students thought that team building was either great or amazing. In contrast, 57% of students thought that career readiness was either great or amazing.

## Food Overall

```
likert_overall_food <- likert(items = survey_df %>% dplyr::select(food))
```

```
likert_overall_food$results
```

Item	Not Great	Meh	Neutral	Great	Amazing
food	0	0	7.792208	3.896104	88.31169

We can see that over 88% of students thought that the food was amazing.

```
plot(likert_overall_food)
```

## Staff Overall

```
likert_overall_staff <- likert(items = survey_df %>% dplyr::select(staff_overall))
```

```
likert_overall_staff$results
```

Item	Not Great	Meh	Neutral	Great	Amazing
staff_overall	0	0	3.846154	7.692308	88.46154

```
plot(likert_overall_staff)
```

We can see that 96% of students thought that the staff was great or amazing. Furthermore, no students had a negative opinion of staff.

## Camp Overall

```
likert_overall_camp <- likert(items = survey_df %>% dplyr::select(camp_overall))
```

```
likert_overall_camp$results
```

Item	Not Great	Meh	Neutral	Great	Amazing
camp_overall	0	0	0	10.25641	89.74359

```
plot(likert_overall_camp)
```

We can see that all of the students had a poitive experience of the camp.

## Return 2025?

The question originally was the following:

- Do you want to return to AMINGA camp in 2024? Queres voltar para o campus Aminga em 2024?

```
return_next_year_df <- survey_df %>%
  dplyr::select(return_next_year) %>%
  count(return_next_year) %>%
  mutate(return_next_year = replace_na(return_next_year, "No Response"))

return_next_year_df
```

return_next_year	n
Maybe	6
Yes	71
No Response	6

```
ggplot(return_next_year_df, aes(x = return_next_year, y = n)) +  
  geom_col()
```

We can see that over 70 students want to return to the camp next year.

## AMINGA 2025 Student Survey Analysis By Gender

### Classes

```
temp_class_gender <- survey_df %>%
